Shelve (s)
Insulated 3/4" Bottom Tray
Clear Outside View

(available in selected sizes)

Garden windows offer a popular way to brighten a kitchen or bathroom, opening the room to more sunlight and providing a plant or knick-knack shelf. The Tru-Frame™ brand "Greenhouse window", offers rounded exterior corners, and a projection of 17.25" from the exterior wall.

Standard Features

- Fusion welded corners (.080 wall thickness) with multiple hollow chambers for watertight strength and energy efficiency.
- Double strength glass standard, 3/4" overall I.G. unit thickness for maximum energy efficiency.
- Exterior glazed for added security because the insulated glass-to-frame seal can only be cut from inside the home.
