TRIPLE-GLAZED
CASEMENT &
AWNING WINDOW

Create a statement with our new **Panorama Series Window**. "Designed with 30% more glass, the pivoting sash nests behind the window frame creating massive views and a clean, contemporary look. The 4" frame depth keeps the glass to the warm zone of the wall. Combine this with a triple weather seal and the result is better thermal performance than ever before. This series comes standard as a triple with 1 3/8" glazing or dual with 7/8" glazing which will meet all energy or thermal performance requirements. Built in casement, awning or picture windows, the Panorama Series is commonly used in modern or contemporary homes.

- 1. Triple weather seal
- 2. Fusion welded frame & sash
- 3. Contemporary design
- 4. Superior u-value
- 5. Triseal super spacer
- 6. Sash leveled with frame
- 7. Low profile design

PERFORMANCE DATA

Picture window: Commercial
Classification. Performance Grade = PG 50

Casement window: Commercial
Classification. Performance Grade = PG 80

Awning window: Commercial
Classification. Performance Grade = PG 30
